PROFILE

Tech passionate individual looking to leverage my expertise to create cutting edge software solutions that are scalable.

EDUCATION

B.S. in Computer Science, M.N. in Applied Statistics, West Chester University 🔗
Relevant coursework: Data Structures & Algorithms, Operating Systems, User Interfaces.

CERTIFICATES

Certified Salesforce Platform Developer 1

Systems Administrators in Information Systems Security

Certified Information Systems Security Professional (CISSP)

PROFESSIONAL EXPERIENCE

C Spire, Software Developer 🔗
August 2022 – present

- Developed and maintained user interfaces using Lightning Web Components (LWC), Visualforce pages, and Aura components, creating dynamic and responsive experiences that align with business requirements and Salesforce best practices.
- Designed, implemented, and tested solutions using Salesforce's declarative tools, including workflows, process builders, flows, and validation rules, to automate business processes and enhance user experience.
- Developed and maintained complex Apex triggers and handler classes to support custom business logic, ensuring efficient data handling and process automation.
- Created and managed integrations with external systems, including the development of callouts to external web services using Apex, ensuring secure and reliable data exchange.
- Created, maintained and enhanced Java Spring Swagger API middleware endpoints that passed data from one system to another.

Investview Inc, Software Developer 🔗
June 2021 – August 2022

- Collaborated in the successful integration of a live brokerage firm into our flagship platform on a large scale using technologies like Java.
- Implemented user interface design enhancements onthe login screen and main panels using Java Swing to optimize user experience.
- Conducted comprehensive testing of trading software for identification and resolution of bugs, and documented streamlined developer workflow processes.
- Performed daily health checks of production environments, servers, microservices, and client applications to ensure 100% system stability before market opening.
- Revamped the software's installer using install4j9, resulting in a 15% increase in total user downloads.
